

SLOTTED PIPE OIL SKIMMERS

Ven's Slotted Pipe Oil Skimmers are used in API oil water separators, steel mills, refineries, and wastewater treatment. The skimmer is a rotating pipe with C-shaped slots. The C-shaped slots are rotated down to the water level to skim the oil. The pipe is turned up and or above the water level when skimming is not required. The skimmer can be installed in a pit with a water level variation of up to 2 meters (standard) and above. VH Slotted Pipe Oil Skimmer is designed to effectively skim oil as per requirement. The swivel joints are specially designed for submerged operation. The Skimmer can be operated manually or can be automated. It can operate in a pit with varying water levels.

Slotted Pipe Oil Skimmer Specifications

Pipe Size	2" to 14"
Material of Construction	SS304/ SS316/ Al or other material
Skimmer Operation	Manual/ Electric/ Hydraulic (on demand)
Swivel Joint	Sealed for submerged operation
Operation	Manual/ Automation

Slotted Pipe Oil Skimmer Features

- Versatile skimmer
- Effective and economical - low operation & maintenance costs
- Unique design: Suitable for variable liquid levels
- Removes a wide range of light to medium viscous oils
- Automated operation option available
- All spare parts are easily available

Application areas of Slotted Pipe Oil Skimmer

- Oily Water Treatment
- Oil & Grease Removal
- Fats Removal
- Chemical Spills
- Coolant Recovery Systems
- Floating Scum Removal
- Pre-treatment Solutions
- MBR Plants
